Professional Experience

MARCH 2016 - PRESENT

Developer and Teacher Assistant – *Byte Academy; New York City*

- Attended a Full Stack Python Intensive Course and completed over 1000+ hours of code.
- Pair programmed daily while learning Python, JavaScript, HTML/CSS, SQL, and Django.
- Designed and developed many web applications using technologies both in curriculum and self taught (Flask, React, PostgreSQL) and hosted them on Digital Ocean and AWS.
- Led team to build a final project (Lazy Sunday), a web application that integrates with Facebook Oauth to create a user account and allows the user to discover new food and movie interests.
- Built APIs using Flask and Django and linked to front ends that have clean interfaces.
- After graduating, stayed on to help teach aspiring full stack developers by pair programming, mentoring, and troubleshooting problems; also presented technologies and ideas to groups during lectures and information sessions.

MAY 2013 - SEPTEMBER 2015

International Business Manager – *Techniques International Corporation; Lagos, Nigeria*

- Executive role leading an international Drilling Project Management Company.
- Created new internal project management system by building applications in Quickbase.
- Regularly presented technical solutions for multi-disciplinary groups to customers.
- Responsible for managing relationships with all clients globally and selling services offered.
- Negotiated contracts with Fortune 500 companies and executed global MSAs. Created and signed JVs for partnerships that expanded products and services offered in West Africa.

MAY 2012 - MAY 2013

Country Manager – *Techniques International Corporation; Takoradi, Ghana*

- Increased revenue 700% in under one year for Ghana office.
- Mentored and trained new engineers to successfully carry out projects and services in support of deepwater Jubilee field exploration and development.
- Made data-driven decisions to maximize revenue and profit margin by expanding on some products and services offered while contracting on ones that were not efficient.
